

Week 1: Acquisition & Disk Forensics

- Computed master SHA-256 hashes for disk, RAM, PCAP, and PST files[cite: 1, 2].
- Initialized Chain of Custody forms (`01_Chain_of_Custody/`)[cite: 2].
- Ingested disk image into Autopsy; carved deleted file `turboblade_v3_draft.step` (`EVD-FILE-001`)[cite: 2].
- Extracted USBSTOR registry entries and parsed LNK files[cite: 2].

Week 2: Memory, Network, & Email Forensics

- Executed Volatility 3 plugins (`windows.pstree`, `windows.cmdline`, `windows.netscan`)[cite: 2].
- Reconstructed Wireshark TCP Stream #14 identifying 14.2 MB exfiltration to `198.51.100.45`[cite: 2].
- Inspected PST email headers and confirmed spoofed recruiter email[cite: 2].

Week 3: Timeline, AI Audit, & Reporting

- Generated master CSV super-timeline using Plaso schema[cite: 2].
- Ran LLM narrative summarization; completed Human-in-the-Loop Fact-Checking Audit Log[cite: 1, 2].
- Compiled final 12-page legal report and 10-slide defense presentation[cite: 1, 2]. ""
